

The Economic Earthquake is only a matter of **when**, not **if**, unless urgent remedial action is taken now. Both political parties here in the USA are drunk on money. Both parties have loudly proclaimed their determination to reign in the deficit that is now a staggering \$20,000,000,000,000.00. But it is just talk. If you take into consideration the other debts owed by State and Federal agencies, the deficit is probably more like \$60,000,000,000,000.00. The Earthquake is coming that will destroy not only the economy of the USA but of the world. A paralysis and great blindness **rule** Washington.

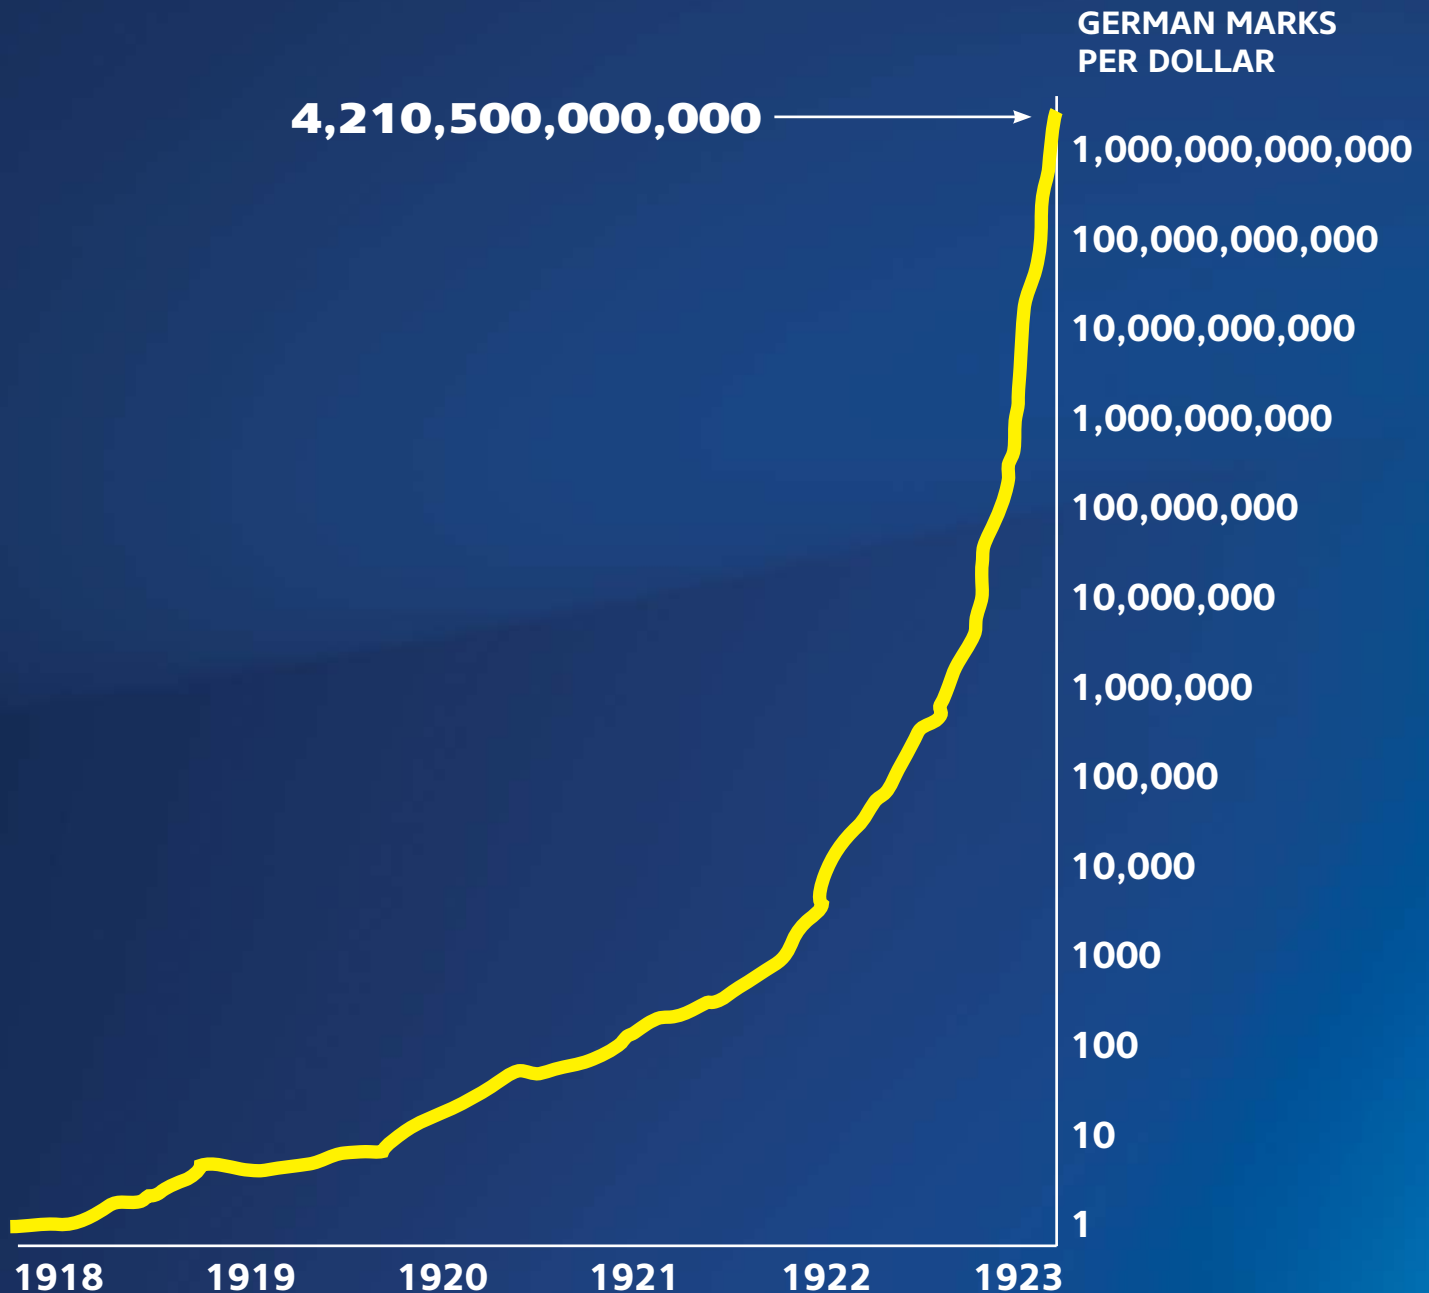

What should you do? Make sure you are right with God. Try hard to get out of debt. Don't trust banks, look what they did in 2008. And wisely use your money now before it is devalued. Remember the Weimar Republic when a loaf of bread cost a billion Marks. The Good News is that Jesus is coming!

We also have work to do: Sound the warning, preach Jesus, and do evangelism.
